

## Markets

We serve a wide variety of markets, including:

- Marine
- RV
- Truck
- Kitchen and Bath
- Cured-In-Place Pipe (CIPP)
- Corrosion
- Wind Energy
- Construction
- Specialty

## Divisions

- Thermoset Resins
- North American Composites
- Molding Products

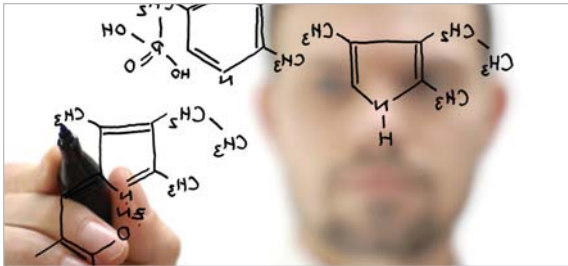

# The Highest Reputation for Quality, Innovation and Service.

Only a leader can offer cutting-edge capabilities that help you succeed with higher quality, better performance and greater profitability.

Interplastic Corporation is an industry leader in providing consistently reliable polyester and vinyl ester resins, gel coats, putties and sheet molding compounds.

We are dedicated to customer service. Our chemists and engineers work closely with you to develop innovative solutions that overcome the toughest product, manufacturing and marketplace challenges. We have a reputation for helping composite and cast polymer manufacturers build better, longer-lasting products.

## Leadership Starts in the Laboratory

Interplastic has five full-service product development laboratories located in Minneapolis and St. Paul, Minnesota; Fort Wright, Kentucky; Hawthorne, California; and South Bend, Indiana. Our ISO 9001:2000 certified laboratories feature award-winning research departments and up-to-date industry technology.

## Manufacturing Excellence

All Interplastic manufacturing facilities are ISO 9001:2000 and ISO 14001:2004 certified. Each location fully supports sales, customer service and manufacturing. An important part of this continual improvement is our commitment to the environment. Our facilities operate in full compliance with all federal, state and local regulations.

Minneapolis, MN	Polyester and Vinyl Ester Resins
Saint Paul, MN	Gel Coats, Putties, Colorants
Pryor, OK	Polyester and Vinyl Ester Resins, Gel Coats, Putties, Colorants
Hawthorne, CA	Polyester and Vinyl Ester Resins, Gel Coats, Putties, Colorants
South Bend, IN	Sheet Molding Compounds
Fort Wright, KY	Polyester and Vinyl Ester Resins, Gel Coats, Putties, Colorants
Kent, WA	Polyester Resins

Our manufacturing facilities have experienced, highly talented and professional teams. We devote significant resources to upgrading our manufacturing and research facilities. This investment enables us to develop and improve products to advance the industry.

## A World of Materials

The best products arise from the best materials, and Interplastic offers a wide selection:

- Vinyl Ester Resins
- Isophthalic and Terephthalic Corrosion-Resistant Resins
- Fire-Resistant Resins
- Laminating Resins
- Pultrusion and Filament Winding Resins
- Polymer Concrete Resins
- Low-VOC Resins
- Cured-In-Place Pipe (CIPP) Resins
- Vacuum Infusion and RTM Resins
- Sheet Molding/Bulk Molding Resins
- Marble/Onyx Resins
- Standard and Custom-Colored Gel Coats
- Solid-Surface Resins
- Tooling Resins and Gel Coats
- Rigid- and Flexible-Panel Resins
- Clear Casting Resins
- Surfboard Resins
- Colorants
- Putties

The essence of Interplastic is our ability to adapt these materials to meet your unique needs. We have the expertise to provide the materials that are best for your specific application—the material that will make your product significantly better than those of your competitors.
